Information about fuel consumption, CO₂-Emissions and power consumption i.t.s. o.t passenger car EnVKV

| | | | |
|---------------|----------------|-------------------------|----------|
| Brand: | Mercedes-Benz | Fuel: | Super E5 |
| Model: | G 63 AMG | other Energy: | |
| Power: | 430 kW (585PS) | Mass of vehicle: | 0 kg |

| | | |
|---------------------------------|----------------------|------------|
| Fuel consumption | combined: | l/100 km |
| | Inner city: | l/100 km |
| | Outside city: | l/100 km |
| CO₂-Emissions | combined: | |
| Power consumption | combined: | kWh/100 km |

The specified values were determined according to the prescribed measuring procedures (§2 Nos. 5, 6, 6a PKW-EnVKV in the currently applicable version). CO₂ emissions caused by the production and provision of the fuel or other energy sources are taken into account when determining the CO₂ Emissions not taken into account according to Directive 1999/94/EC. The information does not refer to a single vehicle and is not part of the offer, but only serves to compare the different vehicle types.

Notes according to Directive 1999/94/EG:

A vehicle's fuel consumption and CO₂ emissions not only depend on the vehicle's fuel efficiency, but are also influenced by driving behavior and other non-technical factors. CO₂ is the greenhouse gas mainly responsible for global warming. A guide to the fuel consumption and CO₂ emissions of all passenger car models offered in Germany is available free of charge at every point of sale in Germany where new passenger car models are exhibited or offered.

| | |
|----------------------------------|---|
| CO₂ efficiency | Calculated on the basis of the measured CO₂ emissions, taking into account the mass of the vehicle. |
|----------------------------------|---|

| | |
|--|--|
| | |
|--|--|

| | |
|--|--------------------------|
| Combined annual tax for this vehicle based on CO ₂ emissions 358 g/km according to WLTP | Euro 992 |
| Energy source costs with a mileage of 20,000 km | |
| fuel costs (Super E5) at a fuel price of <u>1.850</u> Euro/accounting unit | Euro 5,809.00 |
| Electricity costs at an electricity price of <u>0.375</u> Euro/accounting unit | Euro 0 |
